Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: discussed a proposed amendment regarding a solid structure, and reviewed the Glimcher reference that did mention a "solid structure" such as a block of ceramic. Also, it was mentioned that it is unclear if applicant is intending to form a solid structure before it is implanted or applied to the body or have the bone material solidify after it is used and shaped, which can be important in interpreting the method. Also discussed that it would be more clear if applicant defined what is in the bone material.
